# SAGE AND SULPHUR

Made Her Look Twenty Years Younger

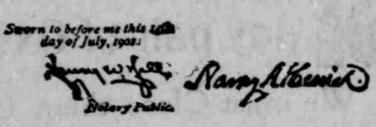

READ MRS. HERRICK'S SWORN STATEMENT

ROCHESTER, N. Y.

Nancy A. Herrick, being duly sworn, deposes and says: When I was a girl I had a head of heavy, long, dark brown hair which was the envy of my friends and which attracted the attention and remarks of strangers, but as I grew older it commenced to come out. When my hair was quite thin and gray, I was induced by the many good reports I had heard of Wyeth's Sage and Sulphur to try a bottle; and you can imagine my satisfaction when I found my hair was fast coming back to its natural condition. I continued to use Sage and Sulphur until my hair was as heavy, dark and smooth as when I was a girl of sixteen. It is now four years since I began using Sage and Sulphur and my hair is in splendid

GERMAN FRUIT GROWER OF LAPORTE TELLS SOME VAL-UABLE FACTS ON PRUN-ING TREES.

Grown so That a Large Amount Can be Marketed at Ore

(Alexander Wurtenberger)

There we feel especially the compet- turns.-Laporte Hearld. ition of American apples. It is true that Germany possesses many very productive and well cultivated apple orchards that yield a handsome profit. On the whole however the German farmer is prevented, by his conservative habits and his desire to follow the example of his father from me ting the growing competition of American fruits.

In many parts of Germany the climate is favorable for the most important of all fruits, the apple. The trouble lies in the habit of people of cultivating more than a thousand different varities of apple, many of which are inferior in taste or appearences, and some lacking in the necessary keeping qualities. The great variety of apples grown near only one, town ripening at various Rev. F. O. Fraley, C. E. Anderson seasons make it impossible to market and F. S. Southworth went to St. the crop to advantage in sufficient Joe Friday to complete the ar- quantities. Our investigation of rangements for the big excursion the conditions in the United States has M. E. Sunday school is going to run led us to the conclusion that the

For our mutual good we workmanship and finish is the same such trees eventually do recover, it are anxious to add your name to the as you get with your new vehicle. still requires additional time before they can again bring their full crop

A very int resting example of the harmfulness of this method of pruning I recall from my own home, were it is thought that it will take an about 60 years ago our government ordered that all of the fruit trees Frank Jacox was the first depositor. growing on public highways be treated in this manner. It is the custom in many south German states to plant fruit trees along all public high ways and to auction off the crop public record, and the results of this painless and guaranteed to cure spavin, Ringbone, Curb, Sweeny, Splint, pruning can be clearly traced in the Puffs, or any enlargement of bone or case in question. The returns had muscle, or money refunded. Price 50c. Chas, Downing, Indianapolis, or Sup- opiates, no harmful drugs. In the ed home to Burr Oak, They were public record, and the results of this

been increasing from year to year, and finally had reached a sum that amounted to more than 100,000 marks. Suddenly the records showed that for ten years no returns had ever come in, excepting a few thousand marks during each of the last four of the ten years in question. The government, noticing this deficit investigated the cause of the poor ercps, and found as a result that the director manager of the fruits had taken up a drastic method of pruning, and cut back the trees about in the manner I saw on several farms in this neighborhood. For the year the returns were cut off or greatly reduced. and never again reached their previous high level.

On the other hand, there is no doubt that some pruning is needed in the orchards of some farms in this district, but it should be limited to the removal of dry wood-to the removal of water sprouts, and of misplaced branches. By water sprouts I mean the strong thin, juicy branch es that grow directly from the stem MOSI IMPORTANT CROP or from the thick limbs, with smooth bark, of en growing to a langth of bark, often growing to a length of three or four feet in one year. When trees are in a strong and healthy con dition, water sprouts should always be removed. In the case of old trees that have begun to decline, Only a Few Varieties Should be and show many dry and siekly branches, one should allow some of the water sprouts to stand and gradully build of them a new crown for the tree, as one removes the older wood.

The line for the development of fruit trees in this district lies only a small way in the direction of prun-Rational fertilizing proper tree, as one remove the older wood, cultivating of the soil, immediately around the tree and in the entire German fruit growers have a high orchard, and the grafting of more opinion of fruit growing in the U. valuable varities onto trees now yield S. which has developed to such an ing inferior fruit, are the more imenormous extent in the last 20 years portant steps to more profitable re-
